

1. Use

earthBorn White Undercoat is a traditional base coat for earthBorn Oil-based Gloss or Eggshell on exterior and interior wood and metal. EarthBorn White Undercoat can also be thinned and used as primer for bare wood.

2. Colours and Product Codes

750ml White 2-3702
2.5ltr White 2-3703

3. Coverage

Approximately 10-12 sq m per litre (0.08-0.1 litre per sq m)

4. Properties

earthBorn White Undercoat has been formulated from traditional paint recipes. It is an opaque matt undercoat used to give subsequent coats a firm and long-lasting base. It is a high solids content paint so has excellent covering properties, good flexibility and is easy to apply. Incorporating natural plant oils, earthBorn White Undercoat is safer and more pleasant to use than conventional undercoats.

5. Preparation

Surfaces must be sound, absorbent, dry, clean and free of dust and grease. For new wood sand and apply a priming coat of earthBorn White Undercoat diluted with 5-10% earthBorn Isoparaffin or Natural Thinners.

Prime new metal with Red Oxide Primer and apply earthBorn White Undercoat.

Lightly sand all previously painted surfaces.

6. Application

Stir thoroughly before use. Apply one even coat. Allow to dry and lightly sand before applying a topcoat of earthBorn Oil-based Gloss or Eggshell. The undercoat can be applied with a brush, roller or spray gun.

7. Drying Time

Depending on temperature and humidity, touch-dry after 2-4 hours but allow 8 hours before applying topcoat.

8. Cleaning

Tools can be cleaned with earthBorn Natural Thinners or Isoparaffin. Wash hands using Hand Cleaner if necessary.

9. Storage

Keep containers tightly sealed and store in a cool, dry and frost-free place.

Shelf life is 2 years for unopened containers.

10. Safety

Please see Material Safety Data Sheet

11. Ingredients

Powdered marble, dolomite, chalk, alumina, soya lecithin, processed soya, soya-based alkyd, titanium dioxide, isoaliphate, d-lemon, cobalt, zinc and zirconium salts as desiccants.

The user is recommended to test the product on the intended surface to ensure its suitability.
